## LEDFL10-30PIR – PIR sensor setup instructions

### Sensor specifications:

Detection distance: 8-12m(<22°C)

Detection range: 180°

Ambient light: 5-1000Lux

Rated load(max): 500W

Operating voltage: 230V/AC

Power frequency: 50Hz

Time-delay: 5±2sec - 5±1min

**LUX:** When turned to symbol of the sun, sensor and light will work all the time throughout the day. When turned to symbol of the moon, light will only work at night.

**TIME:** Adjusts the sensor delay time. (5±2sec-4±1min)

**SENS:** Adjusts the sensitivity of the sensor. Higher sensitivity means longer detection range, but in case of too high sensitivity also pets will turn on the light.
